Reliable, efficient, and one of a kind

Ajax residential fire and life safety devices combine patented technologies, connectivity, ease of installation, and compliance with the most stringent international regulations. With three types of power supply and five sensor combinations, the detectors cover every market need, whereas wireless buttons speed up response to threats. While powerful on their own, the devices are almost unbeatable as part of a larger system united by an Ajax hub. The combined solution can provide users with visual verification of fire alarms and automate response to threats.
